Education

Bachelor of Computer Science and Engineering,
K. S. Rangasamy College of Technology (Autonomous)

CGPA : 8.9
2022 – 2026

Experience

Web Developer Intern — Statix.pro

Jan 2025 – Feb 2025

- Worked on a real-time project to apply and enhance technical skills in a practical environment. Built and optimized user-friendly web interfaces with HTML, CSS, and JavaScript in collaboration with the team. Gained hands-on experience in version control and team collaboration using Git and GitHub.

UI/UX Design Intern — Infixhitech Innovations Pvt. Ltd.

Mar 2025 – May 2025

- Designed mobile app UI/UX using Figma, including login/signup flows, patient dashboards, and appointment booking screens. Created wireframes, user flows, and interactive prototypes to improve user journey and usability. Conducted user feedback reviews and improved the design based on usability insights and accessibility considerations.

Full Stack Developer Intern — CubeAISolutions Tech Pvt. Ltd.

Oct 2025 – Current

- Handled backend development, designing and implementing secure REST APIs with JWT-based authentication in the MERN stack. And connected the React.js frontend with the Node.js + Express backend and MongoDB, ensuring smooth data communication. Gained hands-on experience in version control and team collaboration using Git and GitHub.

Projects

Cattle Enterprises – React + Spring Boot Project

- Built a full-stack dairy farm management web app using React (Vite) and Spring Boot, with secure auth & OTP.
- Deployed on cloud platforms (Vercel/Render) ensuring scalability, real-world usability, and career-focused application.
- Added milk tracking, livestock sales, expense/profit analytics, and real-time dashboards.

Employee Management System – MERN Stack Project

- Developed a full-stack employee management system with roles, attendance tracking, salary management, and secure login using JWT authentication. Connected the React.js frontend with the Node.js + Express backend and MongoDB, enabling seamless data flow and real-time updates.
- Implemented employee CRUD operations, department-wise data handling, and a responsive dashboard for HR/Admin.

Campus to Career – MERN Stack Project

- Developed a MERN web app with authentication, email notifications, and dashboards for students and recruiters.
- Deployed on cloud platforms (Vercel/Render) ensuring scalability, real-world usability, and career-focused application.

Private Company Website

- Developed a professional, responsive company website with interactive elements to enhance user engagement.
- Integrated a contact form with basic client-side validation and deployed the site using GitHub Pages.

Government School Donate Website - UI/UX - Figma

- Designed a user-friendly donation interface with clear navigation and responsive design using Figma.
- Focused on accessibility and visual hierarchy to ensure intuitive interaction across all age groups.

Meditech App Design - UI/UX Figma

- Designed a mobile health app with login/signup, patient dashboard, appointment booking, and an intuitive UI/UX with integrated chatbot using Figma.

Skills

Programming Languages & Backend: Java, Spring Boot

Web Technologies: HTML, CSS, JavaScript, React JS, Express JS

Database: SQL, Mongo DB

API & Testing: Postman

Design & Prototyping Tools: Figma, Adobe XD, Framer, Canva

Achievements

- **Won 1st Place** Idea Marathon, Chennai – for innovative problem-solving and impactful presentation.
- **Won 2nd Place** in paper presentation at Kongu Engineering College.
- EDII-TN Hackathon Level 2 Finalist – Created a GPS-enabled IoT EV booking solution.
- Participated in a 24-hour hackathon at KPR Institute of Engineering and Technology.
- Earned NPTEL Elite + Silver certificate in Human-Computer Interaction.
